S1210 and old version EMI software function contrast		
	S1210	Old Version EMI
Amplitude Calibration	 Support predefined data Support edit curve Support calibration Preview 	 Support predefined data Not supported Not supported
Limit Line Setting	 Support multiple predefined value settings Two limit line Support edit curve 	 8 Not supported 8 One limit line 9 Support edit curve
Scan Setting	 Hardware setup Support LISN Support discontinuous segments 	 Hardware setup Support LISN Not supported
Pre-scanning	Support scanning start / pause / continue / p Support a trace as reference trace	 Not supported Not supported
Peak Search	 Support peak filter:Peak value and limitation Automatic peak Peak list Support set peak number 	 Support peak filter:Peak value and limitation Automatic peak Peak list Not supported
Final-scannig	🤣 Mark final scanning peak	Mark final scanning peak
Output Report	Support reports	Support reports
Image Manipulation	 Support free zoom Support setting display range 	Not supportedNot supported
Mark List	 Support mark list Support adding mark to the peak list Support reference mark 	 Support mark list Support adding mark to the peak list Not supported
Display Mode	S Max Hold/Clear/Repeat Clear	Not supported
Easy to Use Function	 Support Demo mode Overview display settings Support multiple amplitude units Introduce the workspace concept Manage multiple measurements Provide independent data manager function Support multiple languages 	 Not supported
